

PRODUCTIVITY ON THE MOVE. THE HANDHELD THAT'S ALSO A DRIVE.

KEY FEATURES

256MB of storage! Carry dozens of documents, tons of photos, and still have plenty of room for your favorite songs.

The handheld that doesn't forget. Thanks to flash memory, the information on your handheld is saved even if the power runs down. So your data is safe even when you're on the go and you don't have time to recharge or synchronize.

Stunning, extra large color display. With its 320x480 color display, you can choose the best way to work. View your schedule and Word documents in portrait mode and see spreadsheets and web pages in landscape mode in incredibly sharp detail.

New File Transfer. Drag-and-drop files and folders from your desktop to your handheld and back again. And with Documents To Go[®], you can take your important business files with you, edit and use them when-ever you want. Grabbing info to go is that simple.

Doubles as a flash drive. With the new File Transfer application on the Tungsten T5, you can quickly transfer the files and folders you need before you leave the office. Access them on the go or simply plug it into another computer² and work on your files anywhere.

TUNGSTEN™ | T5

It's a whole new way to carry your files—
and put them to work.

With 256MB of storage,¹ the Tungsten™ T5 handheld from palmOne lets you carry more and do more. Word documents. Spreadsheets. PowerPoint presentations. Photos. MP3s. The works. And because it's flash memory, all that information is saved even if the power runs down when you're on the go—and you don't have time to recharge or synchronize. Better yet, the stunning 320 x 480 color screen lets you see more in both landscape and portrait modes.

The real beauty of the Tungsten T5? You can transfer files and even whole folders from your desktop to your handheld, so you have what you need on the road, in a meeting, or when working from home. Even use it like a USB removable drive to work on those files on another computer.² Just when you're thinking there couldn't be room for anything more, we've also built-in Bluetooth[®] wireless technology so you can check email³ and connect to the Internet³ on the go. All this and the Tungsten T5 still fits right in your pocket.
